

Become a partner of Naace...

...a truly independent association for everyone passionate about advancing education through technology

Who is Naace?

We are a charity, a community of educators, technologists and policy makers who share a vision for the role of technology in advancing teaching and learning. Our members include teachers, school leaders, advisors and consultants working within and across all phases of UK education.

Naace aims to promote the appropriate use of technology, not just as a specialist subject but across all curriculum areas and to assist with whole school improvement

Commercial businesses who support our work may become Naace Sponsoring Partners. There are currently some 90+ companies committed to the aim of Naace.

Interested in joining this growing community? Then read on...

How can my company get involved?

The Naace Charitable Sponsorship Programme provides you with an opportunity to support a truly independent association that seeks to build an even stronger community voice that in turn enables us to influence policy for the benefit of ALL involved in technology in education. The programme enables us to build long-term partnerships that deliver clear benefits to our industry partners and vital funds to us.

But don't just take our word for it...

Tim Scratcherd, Director of the School House Partnership

"The School House Partnership has been a sponsor of Naace for many years. The main reasons for this are that sponsorship gives us privileges, highly cost effective access to our customer communities, and it keeps us up to date in a very rapidly changing scene."

Founded in 1999, SHP is an independent transformational change management consultancy, specialising in transforming learning and teaching, and working in partnership with schools on the full range of school improvement issues. www.shpartners.net

Become a partner of Naace...

...a truly independent association for everyone passionate about advancing education through technology

Why does Naace need Sponsoring Partners?

Naace seeks to influence policy at a national level through advice, membership of working parties, consultancy, response to policy documents and its own initiatives in the field of technology in education such as a provision of high-quality CPD, support, guidance and resource.

Naace is in regular contact with key decision makers in government departments and strategic organisations in all four countries of the UK. These activities can incur considerable expense.

Naace is a charitable organisation which cannot meet its objectives purely through subscriptions paid by Members. Many Sponsoring Partners have been willing to share this expense with us.

Sponsorship enables Naace to:

- conduct day-to-day and strategic business of the Association
- represent Members in consultation with government, industry and other stakeholders
- fund a wide range of projects and activities

We are most grateful for Sponsors' financial support, which has most recently enabled us to e.g.:

- Host FREE CPD events like [The Naace Third Millennium Hothouse](#) helping schools and teachers to understand how to use technology so they're not afraid of investing in it and can see real benefits of using it in the classroom;
- Represent the practitioner community in the recent consultations with regard to the [National Curriculum](#) changes;
- Continue to host the [Self-review Framework](#) - a self- evaluation tool used by thousands of schools across the UK; and run the [ICT Mark accreditation scheme](#) - helping schools to understand how to best use technology for their benefit;
- Continue our work to showcase excellence in schools and practitioner led developments in organisations through the [3rd Millennium Learning Award scheme](#) and extended [Naace Impact Awards](#);
- Be able to work on various CPD developments;
- Produce high quality publications for use FREE of charge by members - these include our regular Newsletter, [Advancing Education Journal](#) and various guidance papers;
- Provide FREE CPD to more than 4500 teachers across the UK and beyond through our www.ictcpd4free.co.uk website;

And much more...

Become a partner of Naace...

...a truly independent association for everyone passionate about advancing education through technology

Naace Sponsoring Partners are able to:

KEEP UP TO DATE

- Receive and contribute to the Naace Newsletters and other publications
- Attend Two FREE Networking Events per year with the representatives of the Naace board of management, Naace members and other industry partners; the events are a great opportunity to learn about the latest opportunities in the world of edu tech and hear about how your company can get even more value from being associated with Naace
- Get access to and contribute to exclusive online resources like Advancing Education

INTRODUCE PRODUCTS & SERVICES

- Have your own webpage on the Naace website
- Market your products and services via exclusive Naace initiatives such as national competitions for schools
- Have your products trialled by selected groups of members

NETWORK WITH LIKE-MINDED PROFESSIONALS

- Gain direct access to key professionals either online or face to face at various Naace events
- Use the community expertise to help you with product development

DEVELOP A MORE STRATEGIC RELATIONSHIP WITH NAACE TO:

- co-construct resources
- co-host events
and more....

Every relationship is different and very much depends on what the partner wants to achieve through their association to Naace. Some companies are happy to support us by being “silent partners”, others are very active and make the most out of the PR opportunities available to them.

There’s no 1 fits all when it comes to the partnership opportunities and we’re always happy to discuss new ideas for collaboration.
